Flutter Developer

PROFESSIONAL SUMMARY

Flutter Developer experienced in building production mobile applications, CRM systems, and migrating existing applications to Flutter. Skilled in Flutter, Dart, REST API integration, reusable components, offline-first development, performance optimization, and clean architecture. Experienced in developing maintainable cross-platform applications and using structured AI-assisted workflows while retaining ownership of implementation decisions. Open to new technologies and broader mobile development opportunities.

TECHNICAL SKILLS

- Mobile: Flutter, Dart, Android, Cross-Platform Development, Responsive UI
- Architecture & State: Clean Architecture, Reusable Components, State Management
- API & Data: REST APIs, Dio, Hive, Caching, Offline-First Development
- Engineering: Debugging, Performance Optimization, Unit Testing
- Tools: Git, GitHub
- AI-Assisted Development: Agentic Workflows, Specification-Driven Development

PROFESSIONAL EXPERIENCE

Flutter Developer | Wibits Web Solutions LLP - Nagercoil | Oct 2025 – Present

- Develop and maintain production Flutter applications with complex business workflows, REST API integrations, reusable components, and maintainable architecture.
- Migrate existing mobile applications from other frameworks to Flutter, rebuilding interfaces, workflows, and functionality in structured Dart codebases.
- Optimize application performance, troubleshoot API and integration issues, and improve code quality through consistent development standards.

INTERNSHIP EXPERIENCE

Flutter App Development Trainee | Srishti Innovative - Trivandrum | Aug 2024 – Feb 2025

- Completed a six-month Flutter development internship, gaining practical experience through mobile application projects.
- Earned an A+ performance grade for the internship project, as recorded in the completion certificate.

INDEPENDENT / FREELANCE PROJECTS

Flutter Developer | Independent Projects

- Developed a spiritual worship application to help users access worship-related content.
- Real Estate Event Management App – Developed Flutter interfaces and workflows for organizing events and showcasing properties.
- Developed an attendance management application for a shipping organization.

OPEN-SOURCE PROJECT

LIKE Package - Creator & Maintainer | Flutter Package
pub.dev: pub.dev/packages/like | GitHub: github.com/AjayJasperJ/like

- Built and published a Flutter networking and caching package using Dio and Hive, designed for offline-first application workflows.
- Implemented multi-tier caching, connectivity-aware requests, retry handling, encrypted local storage, logging, sensitive-header masking, and unit testing.
- Maintain package documentation, releases, bug fixes, and ongoing improvements.

EDUCATION

Ponjesly College of Engineering - Nagercoil | 2020 – 2024
Bachelor of Engineering (B.E.) – Computer Science and Engineering
